Series Description: Dreamland is an early, large dahlia-flowered type, providing a great colour show both in containers and in the garden.

Market Use: Pot-/ Bedding plant.

Sales Period: April to June

PLUG PRODUCTION Sowing Medium: Lightly fertilized peat.

Plug Size: 288

Specific Germination Requirements: Zinnia's are very sensitive to high levels of salts.

Germination Temperature (Stage 1): 22-23

Germination Temperature (Stage 2): 18-20

Cover: Seeds may be covered with a thin layer of vermiculite.

Days To Germinate: 4-8

Sowing Period: January to March

Plug Finish Time: 4 weeks after sowing.

Transplanting Description: Stressful conditions may result in premature flowering in the plug tray. Transplant straight after the establishing of the root system.

GROWING ON Temperature (Day): 18-21°C / 64,4-69,8°F

Temperature (Night): 15-18°C / 59-64,4°F

Description: To keep your Zinnia in a good shape, it's essential to maintain a good ventilation and to avoid overwatering. Avoid watering late in the afternoon. Plants will stretch under low light

conditions.

pH: 5.5-5.8

EC: 1.0-2.5 (pour thru method)

Humidity: Low to moderate moistures.

Growth Regulator: Alar

Potsize: 09-10

Packsizes: 16
